IN THE SPECIFICATION:

Please amend the paragraph on page 17, lines 14-28 as shown below:

Figure 6 depicts an element type database (**600**) in accordance with a preferred embodiment of the present invention. Element type database **600** is here represented by a flat file of name-value pairs, although one of ordinary skill will appreciate that any suitable database type may be used in practice. Each name-value pair is on a separate line, such as line **602**. A name (**604**) representing the element type precedes a colon (**606**). Following colon **606** is a base string **608**, containing HTML code. Base string **608** includes placeholders ~~(610, 612, and 614)~~ **(610, 612, 614, and 616)**, which are to be replaced with data from a database or descriptive text file. In particular, ~~placeholder 610, 612, and 614~~ placeholders **610, 612, 614, and 616** are to be replaced with a name, value, and description~~s~~, respectively, from each database entry.
